

How Do Students REALLY Feel About MATH?

46%

love or really like math

24%

hate or dislike it

30%

are indifferent

“Who loves math?”

3 out of 4
of students admit hearing an adult speak negatively about math

44%
have heard an adult say “I hate math”

68%

would like math more if they understood how it applied to their future

77%

of students believe that success in math class means **success** in college/career

Biggest math motivators =

55%

Proving to themselves that they can do it

46%

Desire to get into a better school

40%

Wanting to land a better job or career

This new study commissioned by Texas Instruments and conducted by Research Now Group, Inc., a global leader in digital research, polled approximately 1,000 students across the U.S. between the ages of 13 – 18 to gauge their moods about math and understand what motivates them as they head back to class.
